Wakefern Food Corp.

For over 60 years, Acme Drapemaster has been servicing the commercial, industrial, residential, and medical communities with custom window treatments, cubicle curtains, and draperies. Acme's ability to create custom products allows us to provide a faster, more economical, and highly specialized solution to the customer's specific demands. Acme's custom products are created in our own workshop where we assemble vertical blinds and manufacture customized draperies and window shades, allowing us to expedite the order. We also have accounts with all the major window treatment manufacturers.

With recent studies being released showing the benefits of an aesthetically appealing environment on hospital patients, Acme has taken a big part in hospital renovations providing window shades and draperies to meet specific lighting needs, and cubicle curtains to match the interior room design as well as the intravenous tracks and carriers.

Acme Drapemaster of America can provide services and products for New Jersey, New York, Connecticut, and Pennsylvania. Our sales staff can help you with color coordination and the selection of fabric, overcome design obstacles, assist you in the practical application of each product, and provide shop drawings, literature, and cost estimates. Having total control of the job from the design conception down to the installation, Acme will complete your project on time and within budget making your home, office, or industrial area a true showplace.
